

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

BUREAU OF VITAL STATISTICS.

Ohio has for years been dependent upon a dual system of vital statistics, one operated through the secretary of state and the other through the state board of health. The statistics published by the state board of health covered deaths only, and the annual report of 1906 shows 42,830 deaths reported by health officers in 58 cities, 412 villages and 670 townships, with a total population of 3,607,389, showing a death rate of 11.9. But the state board of health makes no return of births.

The secretary of state's report for the same year shows 31,804 deaths, based upon a population of 4,157,545, showing a death rate of 9.7, both of which would be much too low a death rate if we were to compare them with the census report of vital statistics. The year of 1900 shows a death rate of 17.8 in the registration area, with a population of 28,807,269, of which 75 per cent. are in cities with populations of 8,000 or more, and the death rate in rural portions alone show a death rate of 15.4. The census bureau assumes from these figures that the general death rate throughout the United States would be about 16.3. The lowest death rate in any registration state during the same year was 13.9, reported in Michigan. Assuming 16.3 to be a reasonable death rate in Ohio, based upon the population of 1900, there were 27,440 deaths which were not reported to the secretary of state in 1906.

The secretary of state's report was made from abstracts prepared by the probate judge in each county, whose abstract was made from the returns given by the assessor of each incorporation and township in his county.

The General Assembly passed an act May 1, 1908, which was approved May 5, 1908, to "establish a bureau of vital statistics and to provide for the prompt and permanent registration of all births and deaths occurring within the state of Ohio," the same applying to the rural districts as well as to the cities and villages.

The act provides that the secretary of state shall have charge of the system of registration of births and deaths, prepare all blanks and forms, and all records shall be preserved at the capital of the state in the central bureau which shall be known as the bureau of vital statistics, which shall be under the immediate direction of the state registrar.

"For the purpose of this act the state shall be divided into registration districts as follows: Each city, village and township shall constitute a primary registration district. Provided that the state registrar may combine two or more primary registration districts into one registration district." Ohio having 68 cities, 693 villages and 1,378 townships, making in all a total of 2,139 primary registration districts, which have been combined into 1,153 registration districts, each district having a local registrar, who shall, as provided by the act, appoint a deputy registrar, who shall only serve during the absence, illness or disability of the local registrar. The act further provides that the local registrar shall appoint a sub-registrar where it is necessary for the convenience of the people in some portion of a registration district, but no sub-registrars have been appointed at this time, but will be appointed as soon as the act is put into effect, the working of the same indicating where they are necessary.

The first work of this department was the preparation of the blanks and forms necessary for carrying on this work, and while they were in preparation, we have been securing the names of the local registrars, with the postoffice address and express office, and assigning them territory, as well as getting a complete list of cemeteries with the name and address of the sexton in charge of each.

The system of vital statistics which has been in vogue in the office of the secretary of state was merely figures showing the number of persons dying from various diseases, and the names of the persons dying being retained by the probate judge in each county. The same being true of births.

While the law under which the bureau of vital statistics is operated requires that "within ten days after each birth, the physician or midwife in attendance shall make a certificate of this birth, and forward same to the local registrar of the district in which said birth takes place, and in

case no physician or midwife was in attendance at birth, then it shall be the duty of the father or mother of the child, householder or owner of the premises, manager or superintendent of public or private institutions in which the birth occurred to notify the local registrar, within ten days after the birth, of the fact of such birth having occurred. It shall then in such case be the duty of the local registrar to secure the necessary information and signature to make a proper certificate."

On the 10th of the month, the local registrar shall forward all birth certificates which are in his possession, after making and retaining a true and correct copy of each, to the state registrar for the month preceding.

Section 5 of the act provides, "that no deceased body shall be interred, deposited in a vault or tomb, cremated or otherwise disposed of until a burial or removal permit has been obtained, and no burial or removal permit can be obtained until a complete and satisfactory certificate of death has been filed with the local registrar of the district in which the death occurred."

On the 5th of each month the local registrar shall forward all death certificates to the state registrar after making a true copy of same. Upon receipt of which, statistics will be compiled by color, sex, locality, month and disease, and after compilations are made, they shall be permanently bound and indexed by a card system, and retained for reference at all times. The law requires that all certificates, both birth and death, shall be legibly written in unfading ink, and therefore this record will be of immense value to the state.

It will establish the school age, age of consent, age of admission to practice in various professions, age of voting, as well as the age for military and jury service, and will be of value in pension and insurance claims, as well as inheritance.

The expenditures of this bureau will be found on another page.

*From 1803 to 1850 the Secretary of State was elected by the General Assembly.

†The Democratic party of today claims lineal descent from the first Republican party, with President Jefferson as its founder. Authorities differ as to the date when the party dropped the name Republican and assumed that of Democrat, it being ascribed to various dates between 1805 and 1820.

‡Political parties were disorganized at the time of the election of John Q. Adams. He claimed to be a Republican, as Jefferson, but his doctrines were decidedly Federalistic. The opposition to his administration took the name of Democrat, and elected Jackson President in 1828.
